

1 Data

1. State political variables from ICPSR (1995)

Dep Var	(1)	(2)	(3)	(4)	(5)
Total Abortions in State	442.2714	282.8731	160.2094	-167.8491	-2,709.8880
	(1,257.3360)	(863.5416)	(899.1556)	(877.6550)	(2,382.6180)

Note: Column 5 is the regression discontinuity (margin of victory $< 30\%$). Columns 1 - 5 include state and year fixed effects & cluster errors by state level. Columns 2 - 5 include demographic controls, columns 3 - 5 include controls for local legislature partisanship, columns 4 - 5 include controls for state representatives in Congress.

Dep Var	(1)	(2)	(3)	(4)	(5)
Total Abortions in State	312.5446	-23.7791	-108.5777	-277.5216	-960.9021
	(1,067.2808)	(930.6381)	(955.1660)	(911.4913)	(1,375.8875)

Note: Column 5 is the regression discontinuity (margin of victory $< 30\%$). Columns 1 - 5 include state and year fixed effects & cluster errors by state level. Columns 2 - 5 include demographic controls, columns 3 - 5 include controls for local legislature partisanship, columns 4 - 5 include controls for state representatives in Congress.

Dep Var	(1)	(2)	(3)	(4)	(5)
Total Abortions in State	191.3962	4,648.1126*	-799.3523	3,934.3672	5,407.4309
	(1,031.1340)	(2,707.7178)	(2,124.2970)	(2,733.0909)	(8,287.7869)

Note: Column 5 is the regression discontinuity (margin of victory $< 30\%$). Columns 1 - 5 include state and year fixed effects & cluster errors by state level. Columns 2 - 5 include demographic controls, columns 3 - 5 include controls for local legislature partisanship, columns 4 - 5 include controls for state representatives in Congress.
